Into the future:
E-Comm’s roadmap to 2025 and beyond
New strategic plan focused on resiliency and innovation

With the pace of change accelerating to what can feel like the speed of light, operational resiliency, service quality and collaboration with our public safety partners, has never been more important to tackle the challenges ahead. Given that Maslow’s hierarchy of needs places a person’s safety second only to the basics of food, water and shelter, it is safe to assume our partners and the public expect nothing less.

With that in mind, E-Comm has launched a new strategic plan—(a)SPIRE 2025—to guide the organization as it faces both increasing call volumes and complex social concerns, rapidly changing technology, competition for talent and the biggest overhaul of the 9-1-1 system in 50 years. Innovation and partnership will be at the forefront in order to maximize operational resiliency, every day or in a disaster.

Building on the organization’s previous strategic plans, (a)SPIRE 2025 will lead and inspire the organization’s actions as E-Comm moves into its third decade of providing public safety services in B.C.

“It’s a bold plan—one that is focused on service, the people who provide it, innovation and trusting relationships,” said Oliver Grüter-Andrew, E-Comm President and Chief Executive Officer. “It’s a vision that includes transforming the 9-1-1 platform provincewide, increasing operational and technical resilience against all kinds of threats, bringing our services to more communities in British Columbia and supporting the health and well-being of all our staff in the process.”
(a)SPIRE 2025 summarized:

1. There are five strategic pillars—our Commitments, that we collectively call (a)SPIRE—Service, People, Innovation, Relationships, Expansion. In short, they are the key areas we are directing our attention to.

2. Multiple strategies support each Commitment. For example, under our Service Commitment we have strategies focused on hiring, training and expanding our operational resilience.

3. Ten key initiatives borne out of those strategies are the projects we’re undertaking to support our people, our partners and the public.

(a)SPIRE 2025 is the result of the leadership of our Board of Directors and extensive consultation with our public safety partners, stakeholders and staff throughout 2018.

“We believe (a)SPIRE 2025 puts us on a path to what matters most—safer communities in British Columbia.”

Oliver Grüter-Andrew, E-Comm President and CEO

Key Initiatives

1. Service Resilience and Optimization
2. Strong Workforce
3. Additional Operating Centres
4. Strong Relationships
5. Innovation Centre
6. Next Generation 9-1-1 Implementation
8. Service Expansion
9. Sustainable Funding Assurance
10. Corporate Structure Evolution

Visit ecomm911.ca for full details about our new strategic plan, the Key Commitments and further information on each initiative.
Messages of accomplishment and appreciation for the dedication of our staff and partners were highlighted in E-Comm Board Chair Doug Campbell’s speech at the organization’s Annual General Meeting, held June 20 in the lobby of E-Comm’s Lower Mainland Emergency Communications Centre.

From readying the new 9-1-1/police dispatch centre on southern Vancouver Island to completing all the agency transitions to the new E-Comm next generation radio system, 2018 was a year of new beginnings for our organization.

On the completion of the new South Island 9-1-1/Police Dispatch Centre, Campbell said, “a project this multifaceted takes years of planning and work, and I’d like to thank our staff and our Vancouver Island partners for their extraordinary effort in conceiving, building and opening the centre.” He also praised E-Comm’s Technology and Wireless teams and police, fire and ambulance partners in the Lower Mainland for their efforts in completing the Next Generation Radio Program in 2018 and shutting down the legacy radio network, which was implemented in 1999. Police, firefighters and ambulance paramedics use the E-Comm radio network to communicate their essential messages.

E-Comm’s 2018 Annual Report is available at ecomm911.ca.

2019-2020 Board of Directors
E-Comm’s Board includes elected officials, representatives of emergency services and the provincial government, in addition to municipal staff and local community and business leaders.

Doug Campbell
Board Chair & Independent Director

Brent Asmundson
Cities of Coquitlam, Burnaby, New Westminster, Port Coquitlam, Port Moody, Village of Belcarra

Dan Copeland
City of Delta / Delta Police Board

Bill Dingwall
Metro Vancouver and TransLink

Independent Police Boards (Abbotsford, New Westminster, Port Moody, Transit Police, West Vancouver)

Bill McNulty
City of Richmond

Paul Mochrie
City of Vancouver

Mike Morden
Cities of Maple Ridge and Pitt Meadows

Denise Nawata
Independent Director

Mark Sieben
Province of British Columbia

Richard Walton
City of North Vancouver, District of North Vancouver, District of West Vancouver, Village of Lions Bay

Terry Waterhouse
Cities of Surrey, Langley and White Rock, Township of Langley
This year, we marked 20 years of helping save lives and protect property in B.C. From answering that first 9-1-1 call back on June 8, 1999, E-Comm has grown to a team of more than 650 public safety communications professionals—all dedicated to serving the public and first responders.

Our work affects real people.

We help make sure first responders get home safely at the end of a long shift. No matter who they are or what their circumstance, we get people the help they need—often in the most perilous of situations. We find new ways of doing things and implement technology to support this work so we can keep evolving and getting better. We advocate, we educate and we contribute to a healthy society. I am incredibly proud to say that I am a part of E-Comm and the public safety community. But most of all, I am proud to know and work with every member of our team across four locations. We are also thankful of the many partnerships we’ve cultivated within the public safety community, governments and volunteer organizations over the last two decades.

Earlier this spring, we were honoured to have our Lower Mainland Emergency Communications Centre as the site of an important B.C. Government announcement. Labour Minister Harry Bains announced the Province is extending presumptive coverage to emergency dispatchers, call takers, nurses and healthcare aids. This means they’ll be able to receive workers’ compensation for post-traumatic stress disorder and other mental injuries without having to prove their condition was caused by their work. Adding call takers and dispatchers in the legislation truly recognizes that emergency communications professionals face many day-to-day challenges and need every bit of support possible. Protecting their mental health and well-being is critical.

We too took another step this past quarter to support our staff by welcoming a registered clinical counsellor and certified assistance dog to our team. Lynn Gifford, a specialist in trauma stewardship, joined E-Comm as our Workplace Wellness Manager along with Koltan, a certified assistance dog from Pacific Assistance Dogs. Every day, I see how Lynn and Koltan are having a positive impact at E-Comm. You can’t help but smile and seek a cuddle with Koltan when they enter a room and Koltan knows when you need one. This is such a wonderful initiative and, in the words of one of our team members on Vancouver Island, is “a boost to the happiness factor at work.”

As we look to the future of our service, our workforce and our relationships, I am pleased to announce we now have a new strategic plan to guide the next phase of E-Comm. Called (a)SPIRE 2025, our plan is focused on service, the people who provide it, innovation and trusting relationships. As communities and technology continue to evolve, (a) SPIRE 2025 will be our strategic roadmap, focused on five key commitments: Service, People, Innovation, Relationships and Expansion. I encourage you to have a look at our plan at ecomm911.ca and we welcome your comments at talktoecomm@ecomm911.ca.

In closing, I want to take this opportunity to acknowledge and thank all first responders across our province for helping to keep us safe throughout the summer and, of course, every day of the year.

B.C. Labour Minister Harry Bains was at E-Comm’s Lower Mainland Emergency Communications Centre in April to announce legislative changes providing emergency dispatchers and call takers with easier access to workers’ compensation for mental health disorders stemming from work-related trauma.

“These changes to the Mental Disorder Presumption Regulation are about fairness and support for workers who experience higher-than-average mental harm due to the jobs they do on behalf of British Columbians,” said Minister Bains.

“This is good news for B.C.’s emergency call takers and dispatchers,” added E-Comm President and CEO Oliver Grüter-Andrew. “There is no doubt that, day in and day out, our people can experience high levels of emotional stress, as they work to save lives and support police and firefighters. Call takers and dispatchers are the first contact for people experiencing trauma which can be often traumatic for them, as well.”

In 2018, the B.C. Government amended the Workers Compensation Act to add post-traumatic stress disorder (PTSD) and other mental-health disorders to the list of illnesses recognized as being associated with certain professions—specifically police, firefighters, paramedics, sheriffs and correctional officers. This recognition fast tracks the claims process to access support and compensation for those illnesses following a formal diagnosis.

Emergency dispatchers, whose duties include the dispatch of firefighters, police officers and ambulance services, as well as 9-1-1 call takers who answer direct calls from the public will now be covered under these changes.
E-Comm began its public safety journey when it started answering 9-1-1 calls and providing dispatch services for police and fire departments on June 8, 1999. E-Comm now operates two 9-1-1 call centres and is the first point of contact for 9-1-1 callers in 25 regional districts across B.C. We also own and operate the largest multi-jurisdictional radio network of its kind in the province. All police agencies, 15 fire departments and B.C. Emergency Health Services in Metro Vancouver and Abbotsford use the E-Comm Wide-Area Radio Network to communicate their essential messages.

Here’s a look at other numbers that show the growth of E-Comm’s services over the last two decades.

• In 1999, we started with 177 employees in one location. Today, we are a team of more than 650 across four locations.

• In 1999, we were the first point of contact for 9-1-1 callers in two regional districts in B.C. Today, we’re the Public Safety Answer Point for 25 regional districts.

• In 1999, we dispatched for eight agencies. Today, we provide dispatch services for 73 police and fire agencies.

• In 1999, the E-Comm radio system had 1,362 radios in service. Now, police officers, fire fighters and ambulance paramedics in the Lower Mainland are actively communicating on some 7,000 next-generation radios.

As E-Comm marks 20 years of service, we extend a big thank you to our past and current staff, partners, board members and stakeholders—all working together to help save lives and protect property in B.C.
Recognizing the first first responders during 9-1-1 Awareness Week

It was a week of shout-outs, thank-yous and high-fives as we marked this year’s Emergency Service Dispatchers’ and 9-1-1 Awareness Week (April 7 to 13, 2019). Proclaimed by the Province of B.C., this annual week recognizes the critical role call takers, dispatchers and support staff play in keeping the public and police, fire and ambulance personnel safe.

Here is a sample of some of the appreciation messages E-Comm staff received from our police and fire partners.

“Our dispatchers are the eyes and ears of emergency responders—keeping our officers safe and helping us respond as fast as possible to help those in crisis. We want to recognize the countless ways you daily keep our community safe!”
Chief Constable Mike Serr, Abbotsford Police Department

“Thank you for the opportunity to add my support and appreciation to the staff at E-Comm in recognition of their contribution to public safety, on behalf of the men and women of the District of Hope Fire Department. In particular with our agencies in the Fraser Valley moving to E-Comm, the professional service they deliver made the transition very smooth.”
Chief Tom DeSorcy, District of Hope Fire Department

“During this week and throughout the year, please know that we value the contribution that you make and appreciate all that you do for our officers and our community.”
Chief Constable Andy Brinton, Oak Bay Police Department

“It is with great pleasure that I extend a heartfelt thanks to all the dispatchers for doing a fine job for us. We appreciate your extra effort and patience when dealing with the smaller fire departments.”
Chief Trevor Pike, Sechelt Fire Department

“The work you perform behind the scenes is noted by every first responder and your valuable contributions are a communications lifeline between emergency service workers and the citizens we serve. Without you, first responders would rarely be ‘first’ on the scene and you are an integral part of the broader emergency services team.”
Chief Constable Adam Palmer, Vancouver Police Department

“The work performed by our E-Comm 9-1-1- call takers, dispatchers and technology specialists is so vital to the safety of our community, our citizens and our fire fighters and we thank you for your continued professionalism and support.”
Chief John McKearney, Whistler Fire Rescue Service
E-COMM MISSION
To deliver exceptional emergency communications to the public and first responders that help save lives and protect property.

E-COMM VISION
Safer communities in British Columbia through excellence in public safety communication.

E-COMM VALUES
Respect • Accountability • Integrity • Service • Collaboration

E-Comm joined community safety and emergency response organizations at Delta Police Day on May 16, 2019.

Our E-Comm team was at the BC Fire Expo in June in Penticton. The annual event is the largest exhibition of firefighting equipment and services in the Pacific Northwest.
